

Participate in Cologne's City-Center-Action-Day! 5th June '99: "Internal Security" in course of the counter-activities to the EU-summit.

Day by day it sneaks its way through nearly all politicians speeches, the media and political discussions; the term of "internal security". It must be safeguarded, protected or enforced.

Who's security? And from whom secure?

The security of all people to live in dignity, to have a roof over one's head and enough to eat?

The security for all refugees from eviction, hunger, torture or death? Or at least from social- and state-racism?

Security to criticise the customary conditions without having to fear repression?

SURE NOT !!

Their security is the security to continue to divide the world into economic interests, to classify people into usable and desired, or unusable and undesired. Their security is Fortress Europe, are the infra-red-cameras along the eastern German border, are clean and presentable town centres. Their security carries truncheons and handcuffs and is also called "Zero Tolerance" or "Law and Order".

Their security is a gigantic pile of smelly shit!

Participate in the de-central action-day of conspirative, left-wing groups against security-lunacy, exclusion and racism on June 5th in Cologne. Plan your own small actions, help us make Cologne the most insecure city on the planet - dance, play theatre, juggle, loaf about, protest, demonstrate, agitate,

The European consolidation of Food Not Bombs-groups will, in context with the theme of internal security, emphasize city-center-clean-ups and eviction from city-centers.

So far are planned: street-theatre, free food for all, agit prop,

Participate, plan your own actions and come to the preliminary meeting on June 4th in Cologne (the precise venue will be available at information-posts scattered about town). Don't forget to document your actions and state encroachments if necessary.

Fun can also be resistance - tear down internal security !!

June 5th
